What is market trends for warehouse aisle lighting?

An ongoing trend for warehouse is narrower aisles and higher ceilings, which means warehouse owners are on the way to call for professional light for aisles at new levels. The key here is for buyers to understand that they should not just shop for high bays based on lumens. The should looking into the optics to direct the light where need it most. Save money by wasting less energy and review fixture costs relative to useable output.

② PIR Daylight Harvesting

With HiSmart PIR/Dailight dimming sensor that allows the fuxture dimmed to high level or SmartDim via a remote controller. When it detects presence of any person or forklift working, the sensor would automatically dim light to low brightness or turn off after detection area is vacated for a period of time. SmartDim function is capable of maintaining oversall ambient light level with skylight which means dimming function allows light levels to be adjusted as required.
