ADDITIONAL PRODUCT SPECIFICATIONS

The product has been discontinued online. Please contact our sales representative for more information. The main purpose of these lights is to provide necessary lighting at night to enhance the visibility and efficiency of charging stations. With the increasing popularity of electric vehicles, the demand for charging stations is growing. However, some parking lots and charging stations are not well-maintained, resulting in insufficient numbers of charging stations and inadequate lighting. In such cases, the Bollard lights for charging piles provide an effective solution to these challenges.
